# Digital Culture

Presentation of the digital explorations

# Feedback and Wrap-Up

# Feedback on the Digital Notes

## **A lot of very good content:**

- very good work overall
- very interesting subjects for digital explorations for all students
- an average grade of 14.61 / 20.00

## **Things you need to pay attention to:**

- limit the scope of your analyses
- pay attention to how you use bibliographic references:
  - which references can be cited and which cannot
  - how to mention references in an essay / a presentation
- have a scientific approach to your subject

# Wrap-Up

## **Requirements for the end of the course are:**

- finish your digital exploration
- do not hesitate to ask for feedback via mail
- upload it on Moodle before 29/10/2022 at 11:59 PM, either as:
  - a URL to your digital exploration
  - audio or video files (for podcasts or videos)

## **My advice for the digital exploration is:**

- don't start to work on the output format at the last minute
- don't hesitate to mention the limitations of your work
- don't hesitate to put your original ideas forward

Presentations

# Presentations

## Reminder for the presentations:

- 8-10 minutes by presentation
- your presentation should include:
  - the subject of your digital exploration
  - some first research hypotheses you have
  - some ideas about the output format
  - early results *if you have some*
- this presentation will **not** serve for grading purposes

Thank you!
